Professional Experience

Junior Engineer

Jun 2024 – Present

Cavin Infotech (CavinKare Group), Chennai

- Delivered full-stack enterprise applications end-to-end using Java, Python (FastAPI), Spring Boot and React.js – system design, backend APIs, frontend UI and production release.
- Implemented enterprise identity solutions using Azure AD B2C, Entra ID and IAM, enabling SSO, OAuth2/OpenID Connect and JWT sessions across applications.
- Containerized and deployed microservices with Docker and Kubernetes; built CI/CD pipelines in GitLab and Jenkins, configured Nginx, monitored production with Grafana.
- Built LLM-powered voicebots and chatbots integrating OpenAI, Claude, Grok and Vertex AI via API keys with ElevenLabs and Vapi voice synthesis, delivering multilingual IVA experiences.
- Integrated Slack, Microsoft Teams, Outlook (Graph API), Azure Communication Services, Etisalat SMS/OTP, Vobiz, Twilio and SendGrid for enterprise notifications and alerts.
- Automated business workflows and dynamic workspace orchestration using n8n and AI agents, cutting manual effort across recurring processes.
- Managed GitLab repository governance – access provisioning, branch protection and permission workflows across engineering teams.
- Completed a two-week onsite engagement at Early Childhood Authority (UAE) supporting production deployment and Azure AD B2C issue resolution.

Key Projects

ECA SSO – Centralized SSO on Azure AD B2C and IAM; secure auth and access across enterprise apps, live in production.

Nebula – Enterprise AI assistant using LLM integration for semantic search, document retrieval and meeting summarization.

TALKDock – IVA / voice platform combining LLM conversation, ElevenLabs, Vapi, Vobiz + Etisalat telephony and ACS for real-time voicebots.

MyWorkspace – AI-powered workspace automating workflows via intelligent agents and n8n orchestration pipelines.

GitHub-Slack AI Assistant – LLM-driven assistant that tracks Jira tickets and

GitHub commits and posts contextual updates to the relevant Slack channels.

Slack Webhook Automation – Rule-based, cron-scheduled pipeline that processes Outlook emails and routes them to the right Slack channels via webhook integration.

SalesCode – Facial-recognition attendance and identity verification for secure workforce login/logout.

Sanchu Animal Hospital – Full-stack hospital management: registration, scheduling, records, billing and admin operations.

Achievements & Certifications

- Service Excellence Award – Cavin Infotech (2026); Second Prize – Internal Hackathon (2026)
- Earned 12+ Google Cloud Skill Badges and 13 Salesforce Super Badges
